TRANSPORTATION: SAFETY STANDARDS ON SMALL PASSENGER AIRCRAFT--WITH NINE OR FEWER SEATS--ARE SIGNIFICANTLY LESS STRINGENT THAN ON LARGE

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 52 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. GAO reported on how current federal airworthiness standards and operating rules influence the safety of small aircraft. The Airline Deregulation Act provides that, to the maximum extent feasible, air carrier passengers are to receive the same level of safety regardless of the size of the air carrier. However, GAO found that passengers flying on small aircraft are not provided with the same level of safety as passengers flying on larger aircraft. Both the airworthiness standards and the operating rules which the Federal Aviation Administration (FAA) has established for small aircraft are significantly less stringent than those it has established for larger aircraft. Since the late 1960s, FAA has studied, proposed, or made numerous changes to the airworthiness standards and operating rules. GAO found that these studies and changes either excluded or were not considered mandatory for aircraft with fewer than 10 seats because of the economic impact which such standards would have on the small aircraft industry. Some changes could be made at acceptable costs with substantial safety benefits to be gained; however, FAA has not prepared any costbenefit analysis with regard to modifying the safety standards which apply to small aircraft. This item ships from La Vergne, TN. Paperback.
