

Beginning ASP.NET 3.5 in C# 2008: From Novice to Professional (Paperback)

By Matthew MacDonald

aPress, United States, 2007. Paperback. Book Condition: New. 2nd Revised edition. 234 x 178 mm. Language: English . Brand New Book ***** Print on Demand *****.The most up-to-date and comprehensive introductory book you ll find on any shelf, Beginning 3.5 in C# 2008 guides you through Microsoft s latest technology for building dynamic web sites. This book will enable you to build dynamic web pages on the fly, and it assumes only the most basic knowledge of C#. The book provides exhaustive coverage of , guiding you from your first steps right up to the most advanced techniques, such as querying databases from within a web page and tuning your site for optimal performance. Within these pages, you ll find tips for best practices and comprehensive discussions of key database and XML principles you need to know in order to be effective with . The book also emphasizes the invaluable coding techniques of object orientation and code behind, which will start you off on the track to building real-world web sites right from the beginning-rather than just faking it with simplified coding practices. By the time you ve finished the book, you will have mastered the core techniques and have...
