The Constitution of Matter Modern Atomic and Electron Theories (Classic Reprint) (Paperback)

By Late Nobel Laureate Max Born

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Constitution of Matter Modern Atomic and Electron Theories It would also be out of place, since A. Sommerfeld has recently published a book, Atomic Structure and Spectral Lines, translated by H. L. Brose (Methuen Co. Ltd.), which deals comprehensively, yet simply, with the recent advances in the physical atomic theory. These essays are for those who have not time to. study the larger work of Sommerfeld. M. Born Frankfurt A.M., 20th April, 1920 Preface To The Second Edition The form of these essays precludes any extensive alterations. I have therefore had to confine myself to incorporating the most important of the recent advances, particularly Aston s work on isotopy in ordinary elements, Franck s spectroscopic determination of the electron-affinities of halogen atoms, and Knipping s measurements of the ionisation-energies of the hydrogen halides. For the rest I have only made minor alterations and additions to the references. Dr. R. Minkowski has kindly assisted me in reading the proofs.
