*A very awesome book with perfect and lucid reasons. It really is basic but shocks within the 50 percent of the book. Its been designed in an exceptionally easy way and is particularly merely right after i finished reading this ebook where in fact changed me, change the way i think.*

A Text-Book for the Use of Students, Draughtsmen, and Engineers Engaged in Constructional Work, is the title page description of the first of these two volumes, which is a well written and well developed theoretical treatise giving considerably more space to the theory of stresses and to the elementary and fundamental consideration of the subject of beams and flexure than is the case with the familiar American text-books. Although many of the subjects have been developed mathematically, graphical constructions have been used to a great extent, with the result that many of the formulae, especially those relating to deflections and fixed and continuous beams, are very simply and clearly deduced. The first three chapters are devoted to principals of stresses and strains; forces, areas and moments. Graphical methods for the determination of moments of inertia and their adaptation to any section are very clearly presented and proved. Chapter Four deals with riveted joints and connections and gives a table of the British standard beam connections. A discussion of the methods of failure of riveted joints is also given. Chapters Five to ten treat the entire subject of beams for all conditions of supports and all cases of loading. Many practical examples applying to various formulae and constructions serve admirably to illustrate the theory. The chapter on framed structures explains three methods of determining stresses and gives stress diagrams for the more common types of bridge and roof trusses. The succeeding chapters treat briefly of the basic principles and theories for the design of columns and struts; suspension bridges and arches; masonry structures, such as dams, retaining walls, chimneys and arches; reinforced concrete. The chapter on the latter...
