

de Gids Nieuwe Vaderlandsche Letteroefeningen (59)

Filesize: 7.54 MB

Reviews

A high quality pdf as well as the typeface applied was exciting to see. It really is written in simple words and phrases rather than difficult to understand. You will not really feel monotony at any time of your time (that's what catalogs are for relating to in the event you question me).

(Robyn Nolan)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 104 pages. Original publisher: Ann Arbor, Mich. : U. S. Dept. of Commerce, National Oceanic and Atmospheric Administration, Environmental Research Laboratories, Great Lakes Environmental Research Laboratory, 1978 OCLC Number: (OCoLC)78376529 Subject: Hydraulic models. Excerpt: . . . the respective water surface elevation at Lake Ontario or the H reservoir pool; the river flow entering the reservoir pool;; fb the discharge through the powerhouse; and Aph the surface area of the powerhouse reservoir pool, km². fb The superscript p indicates the solution time increment t At at Equations (10) and (11) complete the equation set for the model. Equa-and (7) are applied to each of the 30 reaches and tions (3), (5), (6), 21 nodal points in the model. These equations, along with equations form a matrix of 120 equations and 122 unknowns. Either (10) and (11), the net total supply (NTS) or water at Kingston, and either the level the discharge through the powerhouse (Q) or the water level at the leaving 120 equations and powerhouse are specified as functions of Phtime, 120 unknowns. The non-linear nature of the equation matrix requires application A Newton-Raphson algorithm with of an iterative solution technique. The Newton-Raphson projected approximations is used in the model. procedure can be defined by equations of the form $u_i = aF_i + \sum_{j=1}^{30} aQ_j$, (12) $F_i = c - AH_j + h_j + aQ_j$ where u_i and h_j represent the upstream and downstream points, respectively, of each reach i ($i = 1$ to 30). The partial derivatives aF_i , aH_j , and $aF_i aQ_j$ are evaluated with finite difference techniques and reach (...)
