For instance, the IKEA Group now comprises 267 stores in 25 countries, with 1, 220 suppliers from all over the world and constantly growing sales - even in times of difficult economic situations (like the late-2000s financial crisis). But what exactly is the secret of IKEAs success How does the Scandinavian home goods company sell so much more to its customers in comparison to its competitors And why do people even use phrases like shopping experience when relating to their time spent in one of IKEAs retail stores In behavioural economics, many experiments have been conducted to find out about psychological factors influencing consumer behaviour and buying decisions. Afterwards, these findings will be applied to the IKEA Group and specific parts of its retail stores. Moreover, the so-called IKEA Effect will be explained in the context of psychological biases.
